

# ELECTRA® - AAA

**ARC AC/DC**

All Positions

Cuts, grooves, gouges and preps all metals.  
(Not magnesium)

2

## FEATURES

- Fast
- Easy re-strike
- High arc force
- AC/DC
- All positions
- Low work temperature
- Significantly less fumes
- No carbon deposits

## CHARACTERISTICS

**ELECTRA-AAA** is a very much improved gouging and cutting electrode designed to provide you with exceptional gouging and cutting capabilities. **ELECTRA-AAA** features low smoke, much more arc force and less fumes.

## APPLICATION

Designed as a tool for removing welds or base metals with very little effort.

Also acts as a contaminant remover and preheater when welding dirty, oil-soaked cast irons.

Ideally used to cut out welds on stainless steels, remove hardfacing materials, make quick cuts when a cutting torch or plasma unit is not readily available.

## TECHNICAL

Size and Amps AC/DC  $\pm$  20%

Inches:	*3/32	1/8	5/32	3/16
(mm):	(2.4)	(3.2)	(4.0)	(4.8)

Amps:	150	225	300	375	<b>*ELECTRA Only</b>
-------	-----	-----	-----	-----	----------------------

With DC use straight polarity. (DCEN)

# ELECTRA®

**ARC AC/DC**

All Positions

Gouges, grooves and cut metals. (Not magnesium)

**ELECTRA** provides means to groove and pierce all metals quickly and easily. The powerful force of **ELECTRA** gouging action produces a clean, ready to weld surface. Fast action keeps the work temperature low, with no carbon residue. **ELECTRA** has similar application and technical specifications as **ELECTRA-AAA**.
